

CSV Cleanup Tool – Quick Start Guide

Purpose:

Merge, clean, and standardize CSV files into Excel-ready datasets.
Designed for non-technical users.

Step 1: Open the Tool

Double-click 'csv_cleanup_gui.exe' in the dist folder.

Step 2: Select CSV Folder

Click 'Browse' and select the folder containing your CSV files.

Step 3: Clean Your Data

Click 'Clean Data'. The tool merges, trims, removes duplicates, and standardizes your data automatically.

Step 4: Find Your Cleaned File

Check the 'cleaned' folder in the project directory.
Open 'clean_data.xlsx' to view results.

Tips:

- Place all CSVs in one folder before running
- No Python knowledge required
- Double-click executable for future use
